Section A: Per-Poster Disease Table

Poster | Human Diseases Mentioned |

|—|—|

Avetisyan et al. (2023) - CCC SP23 | Autism Spectrum Disorder (ASD) |

Berbouti et al. (2025) - CCC FA25 | (*No human diseases identified*) |

Brown et al. (2025) - CCC SP25 | Acid Reflux / GERD; Metabolic Disorder |

Cabral et al. (2025) - CCC FA25 | Neurodevelopmental Disorder; Rett Syndrome |

Camara et al. (2025) - LU SP25 | Alzheimer's Disease; Diabetes |

Dehuelbes et al. (2025) - LU SP5 | Fatty Acid Metabolism Disorder; Metabolic Disorder |

Diaz et al. (2025) - CCC SP25 | Aging (linked to disease) |

Ford et al. (2023) - CCC SP23 | (*No human diseases identified*) |

Gill & Alcazar (2025) - CCC FA25 | (*No human diseases identified*) |

Godoy-Pena et al. (2025) - CCC FA25 | (*No human diseases identified*) |

Haubelt & Alcazar et al. (2025) - CCC FA25 | Parkinson's Disease; Post-Traumatic Stress Disorder (PTSD); Schizophrenia |

Henriquez et al. (2025) - COD WI24 | Inflammatory Bowel Disease |

Holmes (2025) - CCC SP25 | Neurodegenerative Disease; Parkinson's Disease |

Lemus et al. (2025) - FA25 CCC | Metabolic Disorder |

Logan et al. (2025) - CCC FA25 | Cancer (general); Cardiovascular Disease |

Luera et al. (2025) - CCC FA25 | (*No human diseases identified*) |

Meraz et al. (2023) - CCC SP23 | (*No human diseases identified*) |

Nii et al. (2025) - CCC FA25 | (*No human diseases identified*) |

Otala et al. (2025) - LU SP25 | Cancer (general); Cystic Fibrosis; Fatty Acid Metabolism Disorder; Hypoglycemia; Liver Dysfunction; MCADD (Medium-Chain Acyl-CoA Dehydrogenase Deficiency); Neurodegenerative Disease |

Paderna et al. (2025) - CCC SP25 | Oculocutaneous Albinism Type 4 (OCA4) |

Paramo-Ojeda et al. (2025) - CCC SP25 | Cancer (general); Colon Cancer; KRAS-Driven Cancer |

Pedireddi et al. (2025) - CCC SP25 | (*No human diseases identified*) |

Rodriguez (2025) - CCC SP25 | Aging (linked to disease); Galactosemia; Metabolic Disorder |

Sakana et al. (2025) - CCC SP25 | (*No human diseases identified*) |

Trevino et al. (2022) - CCC SP22 | Zellweger Spectrum Disorder (ZSD) |

Tuttle et al. (2025) - CCC SP25 | Aging (linked to disease) |
Zlaket et al. (2023) - CCC SP23 | Zellweger Spectrum Disorder (ZSD) |

Section B: Broad Disease Category Summary

A poster is counted in a category if it mentions **at least one** disease in that category.

Broad Disease Category | # of Posters | % of Total |

|—|—|—|

Neurological & Psychiatric | 5 | 18.5% |

Cancer / Oncological | 4 | 14.8% |

Metabolic | 6 | 22.2% |

Digestive / Gastrointestinal | 2 | 7.4% |

Inherited / Developmental | 3 | 11.1% |

Aging / Neurodegenerative | 5 | 18.5% |

Skin / Pigmentation | 3 | 11.1% |

Cardiovascular | 1 | 3.7% |

No Human Disease Identified | 9 | 33.3% |

Total: 27. Percentages do not sum to 100% as posters may mention diseases in multiple categories.

Section C: Methodology Notes

Disease mentions were identified through keyword pattern matching across the full poster text (Authors and References sections excluded). Both specific named conditions and general terms were captured using the poster's own wording. Broader category groupings were defined to enable aggregate reporting.
