

Human Disease Mentions in Research Posters

Executive Summary

This report analyzes human disease mentions across 27 student research posters. Of these, 21 posters (77.8%) explicitly mention human diseases or conditions, while 6 posters (22.2%) do not mention specific human diseases in their text.

Table 1: Poster to Human Disease Mapping

The following table lists each poster and the human diseases mentioned in the text. Exact wording from the posters is preserved.

Poster	Disease(s) Mentioned	Context Example
Avetisyan et al.	Autism Spectrum Disorder	linked disorders such as Autism (ASD)
Berbouti et al.	No human diseases mentioned	N/A
Brown et al.	Acid Reflux/GERD	human gastric acid disorders such as acid reflux
Cabral et al.	Rett Syndrome	linked to Rett syndrome and related neurodevelopmental di...
Camara et al.	Diabetes; Alzheimer's Disease	may relate to diseases like diabetes
Dehuelbes et al.	Obesity; Metabolic Disorders	Insights into obesity and metabolic syndrome
Diaz et al.	No human diseases mentioned	N/A
Ford et al.	No human diseases mentioned	N/A
Gill & Alcazar	Mental Health Disorders	help us understand mental health disorders
Godoy-Pena et al.	Sleep Disorders	poor diet, low sleep quality, and reduced energy levels
Haubelt & Alcazar et al.	Parkinson's Disease	neuropsychiatric disorder Parkinson's Disease
Henriquez et al.	Inflammatory Bowel Disease; Crohn's Disease	understanding human immune disorders such as Crohn's disease
Holmes	Parkinson's Disease	linked to many human neurodegenerative disorders such as ...
Lemus et al.	Cancer	rectum adenocarcinoma
Logan et al.	Cardiovascular Disease; Hypertension	cardiovascular-related pathways
Luera et al.	No human diseases mentioned	N/A
Meraz et al.	Cancer	tumor-suppression
Nii et al.	Obesity; Metabolic Disorders	obesity, fatty liver disease
Otala et al.	Cystic Fibrosis; Metabolic Disorders	MCADD and Carnitine transporter deficiency, hypoglycemia,...
Paderna et al.	Albinism	oculocutaneous albinism type 4
Paramo-Ojeda et al.	Cancer; Colon Cancer	KRAS mutations drive many human cancers
Pedireddi et al.	No human diseases mentioned	N/A

Rodriguez	Galactosemia	associated with the disease galactosemia
Sakana et al.	No human diseases mentioned	N/A
Trevino et al. - CCC SP22.txt	Zellweger Spectrum Disorder	Zellweger Spectrum Disorder (ZSD)
Tuttle et al.	Neurodegenerative/Aging	kynurenine pathway that has been found to have links to t...
Zlaket et al.	Zellweger Spectrum Disorder	Zellweger's Syndrome

Table 2: Broader Disease Category Analysis

Diseases were grouped into broader categories to understand the distribution of research focus areas across the poster collection.

Broad Disease Category	Posters Mentioning	Percentage
Neurological/Neurodevelopmental	7	25.9%
Metabolic Disorders	4	14.8%
Genetic/Metabolic Disorders	4	14.8%
Cancer	3	11.1%
Gastrointestinal/Digestive	2	7.4%
Sleep Disorders	1	3.7%
Cardiovascular	1	3.7%
No Specific Disease Mentioned	6	22.2%

Analysis Notes

Specific disease terms identified across all posters:

- Acid Reflux/GERD (mentioned in 1 poster(s))
- Albinism (mentioned in 1 poster(s))
- Alzheimer's Disease (mentioned in 1 poster(s))
- Autism Spectrum Disorder (mentioned in 1 poster(s))
- Cancer (mentioned in 3 poster(s))
- Cardiovascular Disease (mentioned in 1 poster(s))
- Colon Cancer (mentioned in 1 poster(s))
- Crohn's Disease (mentioned in 1 poster(s))
- Cystic Fibrosis (mentioned in 1 poster(s))
- Diabetes (mentioned in 1 poster(s))
- Galactosemia (mentioned in 1 poster(s))
- Hypertension (mentioned in 1 poster(s))
- Inflammatory Bowel Disease (mentioned in 1 poster(s))
- Mental Health Disorders (mentioned in 1 poster(s))
- Metabolic Disorders (mentioned in 3 poster(s))
- Neurodegenerative/Aging (mentioned in 1 poster(s))
- Obesity (mentioned in 2 poster(s))
- Parkinson's Disease (mentioned in 2 poster(s))
- Rett Syndrome (mentioned in 1 poster(s))
- Sleep Disorders (mentioned in 1 poster(s))
- Zellweger Spectrum Disorder (mentioned in 2 poster(s))

Disease Category Definitions:

Neurological/Neurodevelopmental: Includes autism spectrum disorder, Rett syndrome, Parkinson's disease, Alzheimer's disease, schizophrenia, and general mental health/neurodegenerative conditions.

Metabolic Disorders: Includes diabetes, obesity, metabolic syndrome, fatty liver disease, and general metabolic disorders.

Cancer: Includes all cancer types (colon cancer, colorectal cancer, tumors) and oncogene-related research.

Gastrointestinal/Digestive: Includes acid reflux/GERD, Crohn's disease, and inflammatory bowel diseases.

Cardiovascular: Includes cardiovascular disease, hypertension, and heart-related conditions.

Genetic/Metabolic Disorders: Includes albinism, Zellweger spectrum disorder, and galactosemia.

Sleep Disorders: Includes sleep quality issues and related conditions.
